Message from the Guest Editors

Dear Colleagues,

This Special Issue is interested in how wellness can be achieved in terms of public health environment and community care in the workplace and in information technology. Psychological health is often used interchangeably with mental health care and is mainly considered for stress management. However, this Special Issue considers smart care for public wellness because our nursing and public health are integrated with information technologies to support public health, and such integration can support public health promotion. Information technology could improve overall quality of life by promoting workers' wellness and satisfaction. This Special Issue welcomes research contributions on wellness care in public health and community care. The aim is to highlight issues on wellness in public health and community care by emphasizing psychological and physical health promotion perspectives.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
