Deadline for manuscript  
submissions:

**closed (2 December 2019)**

Individual religiosity, faith-based organizations, and community-level religious ecologies have been shown to exhibit a robust relationship with public health. The prevention and treatment of various diseases can be hastened by accounting for religiosity and religious coping behaviors. Extant research also reveals the complexity of the religion–health relationship, such that faith can sometimes facilitate wellness and other times undermine it. Despite such mounting evidence, scholarship examining religious influences on public health still lags behind that focused on other social correlates. Data gaps are one obstacle to advancing the field. In addition, some researchers have a lack of familiarity with this core social institution. Given religion’s persistent public presence across the world.

This Special Issue aims to advance current scholarship on religion and public health across various locales and faith traditions while also charting methodologically novel avenues of exploration. Papers examining religious influences on public health are especially welcome, but those exploring how health may affect religious participation and spirituality are also solicited.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
