Message from the Guest Editors

In the 21st century, the largest wave of urbanization in human history was witnessed; with it has come many crises and challenges such as ecological degradation, and so on. In 2015, the Sustainable Development Goals (SDGs) were proposed by the United Nations. Territorial space is the spatial carrier of sustainable development of cities and communities. In the process of urbanization, land use has been faced with such problems as disorder development, and so on. Solving these spatial utilization problems and realizing sustainable development through territorial spatial planning and governance are facing challenges in theory, methods, and practice. This Special Issue aims to explore current and emerging trends in the field of territorial spatial planning and governance. The topics of this Special Issue include, but are not limited to, the following: 1. Theory and methods in territorial spatial planning and governance; 2. Assessment of a case in territorial spatial planning and governance; 3. Territorial spatial governance and public participation; 4. Ecological restoration and comprehensive land governance; 5. Carbon neutralization and territorial spatial planning.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
