Message from the Guest Editors

Women's health disparities exist worldwide due to biological and gender-related differences in, as well as sociocultural barriers limiting access to, the use of quality health care. Health outcomes in women are related to the infrastructure of communities and societies, and are often a reflection of women's place in society. Women's positions in society are influenced by their educational, cultural, economic, legal, and political position. These are closely linked with women's empowerment—a process by which women have the ability and agency to make strategic decisions about many aspects of life, including health, economics, familial, and interpersonal decisions.

This Issue will have a broad focus on the impact of women's empowerment on several dimensions of women's health, including reproductive health, pregnancy, childbirth, postnatal outcomes, quality of care, abuse and violence, and mental health. We welcome original research papers using different study designs as well as systematic reviews and meta-analyses.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
