closed (31 August 2023)

Message from the Guest Editors

Cardiovascular diseases (CVDs) are a global epidemic and are among the most impressive demographic phenomena around the world. CVDs are the leading cause of death globally, taking an estimated 17.9 million lives each year. CVDs are a group of disorders of the heart and blood vessels and include coronary heart disease, cerebrovascular disease, peripheral disease, rheumatic heart disease, and other conditions.

The aim of this Special Issue is to provide a collection of original research articles, comprehensive reviews, and communications, highlighting the latest frontiers in basic, translational, and clinical research. Acceptable topics include the use of new technologies in diagnosis and treatment of CVDs. Particular interest will be given to genetic, molecular, clinical, and immune biomarkers, as well as to novel invasive tools.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
