Message from the Guest Editor

Dear Colleagues,

As there is growing recognition of the need to maintain healthy environments to sustain healthy communities, this Special Issue is dedicated to studies examining aspects of aquatic ecosystem health. Related topics include, but are not limited to, ecosystem health assessment, disturbance ecology, aquatic food web ecology, invasive species monitoring and impacts, novel monitoring tools, assessments of aquatic ecosystem responses to climate and extreme weather events and links between ecosystem and human health. All of the research outcomes are intended to contribute to the development of best management practices in aquatic ecosystem health assessment and reporting. This Special Issue is open to any subject area relating to aquatic ecosystem health. Research papers, analytical reviews, case studies, conceptual frameworks, and policy-relevant articles are welcome.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
