Message from the Guest Editors

The coronavirus disease that started in 2019 (COVID-19) has meant a radical and unexpected alteration in certain habits and aspects of daily life globally. Among these, its appearance has caused important changes in both the health and education sectors, highlighting how government organizations have been able to adapt to the pandemic. The repercussions on educational capacities are assessed at the same time as the evolution of the disease. This new scenario requires adaptation measures and adjustments that reduce the economic, social, and technological gap in society. Likewise, COVID-19 has effects on the health economy, with consequences that are difficult to assess at present. It is interesting to understand the pandemic as an opportunity to study, in-depth, the functioning of the educational and economic systems in relation to the implications of the disease. This Special Issue on the “Effects of COVID-19: Issues in Health Economics and Education” aims to publish high-quality articles covering all fields of the implications of COVID-19 in health economics and education.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
