Message from the Guest Editors

We are currently creating a Special Issue of the *International Journal of Environmental Research and Public Health*, and we would like to invite you to submit your research. This Special Issue intends to outline the different perspectives and challenges that we face in the 21st century. The worldwide fire regime is essential in assessing fire vulnerability and the effectiveness of prevention and suppression activities. This Special Issue aims to cover, without being limited to, the following areas: fire risk and danger, fire behaviour, fire vulnerability (ecological, socioeconomic, etc.), fire impacts assessment (on vegetation, soil, atmosphere, etc.), wildfires in wildland urban interface, fire resilient ecosystems, wildfire suppression (tactics, effectiveness, etc.), and fire prevention treatments (shaded fuelbreak, mastication, prescribed fire, etc.) Papers from a multidisciplinary point of view are also welcomed.

Deadline for manuscript
submissions:

closed (31 July 2023)

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
