submissions:

closed (5 October 2023)

Message from the Guest Editors

Cancer diagnosis and treatment can have dramatic effects on the physical, psychological, and social wellbeing of patients and their caregivers and may cause a wide range of informational, emotional, and social unmet needs in the cancer trajectory of patients. This Special Issue is addressed to evaluate the impact of health intervention on cancer epidemiology, investigating patients' and caregivers' health needs for supplying information, empowering people and orienting patients and caregivers towards specific social and health services, evaluating and planning re-orientation strategies based on health promotion principles, developing health-literacy competences, promoting healthy lifestyles for specific community groups, implementing policies and actions for active ageing, evaluating and promoting cancer screening adherence by the community, and implementing vaccination programs for specific high-risk groups.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
