Message from the Guest Editor

Dear Colleagues,

This Special Issue focuses on research in the field of maternal and child health, including perinatal and pediatric epidemiology and health services research. We are interested in population-based research that provides generalizable insights into the causes and consequences of health disparities in pregnancy outcomes, maternal reproductive health, access to and quality of health services for preconception care, prenatal care, postpartum care, and infant and child health care. Single-center studies will not be considered for inclusion. Studies may come from clinical research sources, population-based administrative health databases, or representative sample surveys. Cross-national studies are encouraged, as well as systematic reviews provided the included studies meet the above criteria.

Prof. Dr. Russell S. Kirby

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
