Estevez**

Message from the Guest Editors

According to the WHO, over 1 billion people live with some form of disability, and the number of people with disability are dramatically increasing. This is due to demographic trends and increases in chronic health conditions, among other causes. Furthermore, people with disability are disproportionately affected during the COVID-19 pandemic.

Deadline for manuscript
submissions:

closed (20 December 2022)

In this context, it is more important to address issues of inclusion. For this reason, the use of technology in different ways allows not only helping people with disabilities but also the possibility to be tele-assisted by improving aspects of their inclusion and autonomy, which are fundamental in the total development of this wide group of people.

Papers addressing these topics are invited for this Special Issue, especially those combining a high academic standard coupled with a practical focus on providing optimal assisted living solutions.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
