

## **2nd Edition: Water Quality and Ecosystem Monitoring, Analysis, and Management**

Guest Editors:

**Prof. Dr. Soon-Jin Hwang**

Department of Environmental  
Health Science, Konkuk  
University, Seoul 05029, Republic  
of Korea

**Prof. Dr. Young-Seuk Park**

Ecology and Ecological  
Informatics, Department of  
Biology, Kyung Hee University,  
Seoul 02447, Republic of Korea

**Prof. Dr. Ihn-Sil Kwak**

Department of Ocean Integrated  
Science, Chonnam National  
University, Yeosu 59626, Korea

Deadline for manuscript  
submissions:

**closed (24 March 2023)**

### **Message from the Guest Editors**

Water, a critical resource for human survival and ecosystem sustainability, involves a variety of interacting factors that determine its condition. Intensifying land use, increasing water demand, eutrophication, pollution, and climate change have worsened water quality in recent years. Therefore, it is important to understand water quality problems in the framework of both watershed and ecosystem integrity.

This Special Issue follows on from the first edition, focusing again on the current state of knowledge on water quality and ecosystem monitoring, analysis, and management with respect to related challenges in this area, such as land use, eutrophication, chemical and heavy metal pollution, harmful organisms and their metabolites, ecosystem health, and climate change. We welcome the submission of research papers, systematic reviews, and technical and methodological papers. We will also consider relevant manuscripts from different disciplines, including toxicology, epidemiology, environmental risk and health impact assessment, and policy and intervention science.

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Paul B. Tchounwou**

RCMI Center for Urban Health  
Disparities Research and  
Innovation, Richard Dixon  
Research Center, Morgan State  
University, 1700 E. Cold Spring  
Lane, Baltimore, MD 21251, USA

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
