Deadline for manuscript
submissions:

closed (31 March 2022)

Message from the Guest Editors

The Internet has revamped the marketing world for businesses and consumers. Courtesy of social media, i.e., Twitter, Facebook, and other platforms, consumers have an opportunity to share, contribute, and access information with simple clicks. Empowered with information, consumers shape the market trends and invite unprecedented competition. Consequently, for a sustainable business, improvised marketing methods are inevitable.

Digitally intertwined global culture has invited confusion and complications at the psychological level, e.g., consumer response is agitated by national and international brands' assertive marketing campaigns. Technology (e.g., the internet and smart devices), a double-edged sword, has put consumers at risk, i.e., mental fitness, anxiety, aggression, and depression. Where technology is making everyday life easy, it is also leading to reduced sleep and exaggerated laziness. This scenario demands a scholarly discussion from the perspective of consumer wellbeing in this digital business world.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
