Message from the Guest Editor

Dear Colleagues,

Humans have exploited insects for various purposes since antiquity. Indeed, the role of insects in human evolutionary history and wellness is indisputable. Nevertheless, there is a large range of practically unexplored compounds in insects awaiting discovery and development. Insects and their derivatives serve a broad range of new applications, and these “raw products” have advanced at a dramatic pace into many research fields.

This Special Issue on “Insects and Their Derived Products: Emerging Themes and Future Research Directions” mainly focuses on cellular and molecular events induced by insect products and their derivatives, including basic studies in biochemistry, molecular biology, and molecular medicine. Contributions of review articles and original research, exploring aspects of the biological activity of insect products and their possible applications, not only in terms of composition, chemistry, analysis, but also of the impact on human health, are welcome.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
