Deadline for manuscript
submissions:

20 May 2024

Message from the Guest Editors

Dear Colleagues,

The growing interest in the pathogenesis of immune-mediated skin diseases (skin IMIDs) has led to the identification of several inflammatory pathways crucial for their development and maintenance.

Fortunately, research in recent years has led to highly effective new treatment options, while further options are expected to be unveiled in the near future. However, open questions remain: What are the main pathological drivers of skin IMIDs? What is the role of the skin microenvironment? What are the mechanisms underlying the systemic involvement in skin IMIDs? Are there predictive biomarkers for systemic targeted treatments? Can an early therapeutic intervention really change the natural history of skin IMIDs and their systemic repercussions?

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: psoriasis, atopic dermatitis, acne, rosacea, lichen sclerosus, suppurative hidradenitis, autoinflammatory skin diseases, systemic sclerosis, allergic contact eczema, chronic spontaneous urticaria, bullous diseases, and chronic graft versus host diseases.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
