and Genetics, Faculty of
Medicine, Josip Juraj
Strossmayer University, Osijek,
Croatia

Prof. Dr. Borut Peterlin

Clinical Institute of Genomic
Medicine, University Medical
Center Ljubljana, SI-1000
Ljubljana, Slovenia

Deadline for manuscript
submissions:

30 September 2024

Message from the Guest Editors

Since the completion of the Human Genome Project and the development of high-throughput sequencing techniques, the field of human genetics has undergone significant advancements. On the other hand, during the last 70 years, fertility rates have decreased worldwide by 50% and infertility has become a frequently diagnosed medical condition affecting over 15% of couples worldwide. It has been estimated that approximately 50% of the causes of infertility are related to genetic factors. The main known genetic causes of infertility include chromosomal aberrations, monogenic diseases, and phenotypes with multifactorial inheritance. The physiology of reproduction involves several paracrine, autocrine, and endocrine processes. They are regulated by a number of genes and any discrepancy in these processes can lead to infertility. As a result, various genetic tests have become essential in determining the genetic causes of infertility.

The aim of this Special Issue is to collect clinical and basic research studies reporting novel insights in the genetics of human reproduction. Original scientific research articles or comprehensive reviews are welcomed.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (Inorganic Chemistry)
