### Message from the Guest Editor

Dear Colleagues,

Oncology research continues to unveil the molecular signatures that define tumor characteristics and behavior, increasingly shifting its focus on the complex molecular pathways implicated in tumorigenesis, cancer cell proliferation, inflammation and angiogenesis, tissue infiltration and dissemination to distant sites. Novel research should focus on better investigating the molecular mechanisms that promote cancer and on the development of efficient therapeutic and pharmacological interventions. In the current issue, we welcome research and review articles focusing on diverse molecular mechanisms implicated in different steps of carcinogenesis which could serve as therapeutic targets.

Dr. Giovanna Casili

## Editor-in-Chief

### Prof. Dr. Maurizio Battino

Department of  
Odontostomatologic and  
Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of  
Medicine, Università Politecnica  
delle Marche, Via Ranieri 65,  
60100 Ancona, Italy

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
