Deadline for manuscript
submissions:

30 June 2024

Message from the Guest Editor

Dear Colleagues,

"Sugar signalling and its interaction with phytohormones" are crucial for plants' growth and development.

Therefore, plant biologists are interested in the critical role that sugar, alone or in combination with other endogenous signals, plays throughout plants' lives.

This Special Issue covers the following topics:

- Sugar sensing and signal transduction pathways;
- Cross-talk between sugar and hormone signalling pathways;
- Cross-talk between sugar and hormone signalling pathways under adverse environmental conditions;
- Cross-talk between sugar and hormone signalling pathways in plant development;
- Cross-talk between sugar and hormone signalling pathways in plant nutrition.

Prof. Dr. Soulaïman Sakr

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
