submissions:

20 July 2024

Message from the Guest Editor

Dear Colleagues,

In spite of the huge improvement in cancer diagnostics and treatment it is still a great challenge to provide good predictive markers and therapy to diagnose, predict the outcome and to cure the disease without recurrence. Oxidative stress is one of the factors which plays a role in both cancer development but also as a mechanism of action against it. Therefore, it is not surprising that new players are discovered with a role in oxidative stress modulation and cancer development and progression. The issue is open to original and review papers describing new player in oxidative stress response in cancer, as well as antioxidative defence that can be used in cancer diagnostics, prediction of the disease outcome and possible new therapeutical targets.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
