Deadline for manuscript
submissions:

30 June 2024

Message from the Guest Editor

Mitochondria are the powerhouses of the cell, generating over 90% of a cell's energy requirements by way of oxidative phosphorylation in the respiratory chain. The mitochondria host several other important metabolic processes, such as Krebs cycle, β -oxidation of fatty acids, and heme biosynthesis, playing a central role in cellular events. Mitochondria are also involved in oxidative stress, redox regulation, in apoptosis, in immunomodulation, and in ageing. Mitochondria receive and integrate intracellular signals, contributing to the orchestration of cellular functions. Novel mitochondria-associated molecules have also been discovered, uncovering new roles of mitochondria in the regulation and fine-tuning control of cellular metabolism. Interestingly, mitochondrial dysfunction is associated with many pathological conditions such as cancer, myopathies, and metabolic, cardiovascular, and neurodegenerative diseases. Thus, mitochondria are considered to be important therapeutic targets for these highly prevalent diseases.

We will highlighting recent novel findings on the characterization of the biochemical and molecular mechanism underlying mitochondrial functions.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (Inorganic Chemistry)
