Deadline for manuscript  
submissions:

**closed (31 January 2024)**

### Message from the Guest Editor

Dear Colleagues,

The increasing contamination causes changes in the structure and function of the environment, affecting the normal life activities of organisms in the environmental media, while harmful substances may enter the human body through the food chain/food web, posing a serious threat to human health. Therefore, the question of how to remediate environmental pollution in an efficient and safe manner must be addressed urgently.

Most contemporary studies focus on the mechanism of adsorption of pollutants by various materials, among which nanomaterials have high adsorption capacity and reactivity and can rapidly remove a variety of pollutants from the environment through various physicochemical methods. This is a type of environmental remediation agent with great potential to form complexes with pollutants to increase the migration rate and bioavailability of pollutants, accelerating the remediation of hazardous substances in soil. The use of nanomaterials may be greatly reduced as a consequence, resulting in cost savings and reduced secondary contamination compared to traditional methods.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
