Deadline for manuscript  
submissions:

**31 July 2024**

### Message from the Guest Editor

Over the last few decades, several targeting strategies for targeted drug delivery have been established, including small-molecule-, nucleic acid-, peptide-, antibody- and cell-based strategies.

Among these strategies, nucleic acid aptamers are single-stranded oligonucleotides which are identified via systematic evolution of ligands using the exponential enrichment (SELEX) method, and can specifically bind to target molecules. Compared to traditional protein antibodies, aptamers have several advantages, such as small size, high binding affinity, specificity, good biocompatibility, high stability and low immunogenicity. At the same time, they are versatile, flexible, three-dimensional structures that can be conjugated to chemotherapeutic drugs and nanocarriers, and facilitate their transport into the target tissue and cells, which makes them a strong candidate for tissue-specific drug delivery. Thus far, the majority of the aptamer-based drug delivery researches are being investigated in preclinical trials.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
