submissions:

30 June 2024

Message from the Guest Editor

Dear Colleagues,

To date, nanostructures in various forms, including inorganic/organic nanoparticles, nanocapsules, nanogels, nanofibers, nanocomposites, and even nanocoatings, have been designed and developed. These nanostructures can have intrinsic antibacterial/anticancer properties or can be used as nanocarriers for loading molecules/biomolecules with antibacterial/anticancer effects.

The last decade has seen advances in the design of these nanocarriers, not only in their synthesis but also in surface functionalization approaches. Through this progress, various characterization techniques have also been employed to indicate their successful synthesis as well as the successful loading of active molecules. These nanocarriers have been used for the treatment of cancer as well as infections from the in vitro to in vivo level.

Moreover, different theoretical modelling/calculation/simulation methods, including density functional theory, molecular docking, molecular dynamics, Monte Carlo, etc., have been used to investigate the interactions at the molecular level, leading to new insights into nanocarrier design.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
