Italy

Deadline for manuscript
submissions:

closed (31 August 2023)

Message from the Guest Editors

In the past decades, the demand for nanotechnology has been increasing, and the application of nanomaterials has become more and more extensive. Nanomaterials have been applied in biomedical as drug delivery, tissue engineering, and diagnostics for disease. Nanomaterials' application in drug delivery systems can provide different advantages, such as drug protection, improving drug bioavailability, modifying drug distribution with targeting activity, and controlling drug release concerning the specific different routes or treatment disease (ophthalmic administration, cancer treatment, brain diseases or more specific disease such as coronary artery disease). Therefore, the purpose of this research topic is to collect original research articles and review papers that present an overview of current trends and applications of different nanomaterials (polymers, lipids, surfactants, active drugs) by investigating their effect on the final characteristics of the nano-drug delivery system. Particular attention will be paid to the safety of raw nanomaterials and the developed nanosystem, discussed about the target site and application in human medicine.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
