**Dr. Sylwia Zielińska**

Department of Pharmaceutical Biotechnology, Faculty of Pharmacy, Wrocław Medical University, Borowska 211, 50-556 Wrocław, Poland

Deadline for manuscript submissions:

**31 August 2024**

### Message from the Guest Editors

Dear Colleagues,

Under normal conditions, reactive oxygen species (ROS), such as superoxide radicals, singlet oxygen, hydrogen peroxide, and hydroxyl radicals, act as signaling molecules (oxidative signaling) in the regulation of physiological processes in plants. As a result of primary stresses, ROS can be overproduced and accumulated in plant cells, tissues and organs. This stress can have a destructive effect on many macromolecules within cells, including the oxidation of proteins, lipids, and nucleic acids, and can damage the structure and function of cell membranes and organelles.

The goal of this Special Issue is to provide a deeper insight into the molecular response of plants facing SOS. Plant survival and tolerance strategies require changes in physiological, biochemical and molecular mechanisms of cellular metabolism. Application of OMICS studies like transcriptomics, metabolomics and proteomics can provide information on overexpression of antioxidant enzymes and levels of small-molecule antioxidants.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (Inorganic Chemistry)
