Department of Medical and Surgical Sciences and Biotechnology, Faculty of Pharmacy and Medicine, Sapienza University of Rome, 04100 Latina, Italy

Dr. Vittoria Cammisotto

Department of Clinical Internal, Anaesthesiological and Cardiovascular Sciences, Sapienza University of Rome, 00161 Rome, Italy

Deadline for manuscript submissions:

closed (15 March 2024)

Message from the Guest Editors

Dysmetabolic conditions, such as hyperglycemia, insulin resistance, dyslipidemia, metabolic syndrome and type 2 diabetes, affect an increasing number of people worldwide. For example, lipids and lipid droplets accumulating in cardiomyocytes are common phenotypic features of dyslipidemia and metabolic syndrome in heart disease. Dyslipidemia in metabolic syndrome is characterized by rich apolipoprotein (apo) B-100 particles and high levels of triglycerides, and is an established risk factor for cardiovascular disease. The role of dyslipidemia and metabolic syndrome in cardiac dysfunction involves a variety of pathological metabolic mechanisms, such as changes in oxidation and fatty acid uptake caused by impaired insulin signals and changes in the lipoprotein profile and lipoprotein receptor. These events lead to altered basic functions and signal pathways, such as fat oxidation and phagocytosis regulating autophagy, thus affecting the fate of cardiomyocytes and vascular cells and their resistance to stress. The discovery of novel pathogenetic mechanisms in cardiac remodeling and dysfunction will pave the way for new exploitable therapeutic targets.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of
Odontostomatologic and
Specialized Clinical Sciences,
Sez-Biochimica, Faculty of
Medicine, Università Politecnica
delle Marche, Via Ranieri 65,
60100 Ancona, Italy

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
