This Special Issue is planned to bring together a number of original papers and reviews covering (but not restricted to) the following topics:

- New fabrication methods of biopolymer-based composites;
- Structure–property relationships in biopolymer composites;
- Properties of natural polymers, biopolymers, and their blends and composites (mechanical, thermal, electrical, optical, chemical, magnetic, etc.);
- Antibacterial activity of biopolymer-based composites;
- Applications of reinforced polymeric biomaterials;
- Biopolymer composites in medical applications;
- Biopolymer composites in electronics;
- Biopolymer composites in water purification;
- Biopolymer composites in the packaging and food industry;
- Future perspectives for biopolymeric materials.

The International Journal of Molecular Sciences (IJMS, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. IJMS publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in IJMS and consider publishing your next paper with us.

Author Benefits
