closed (30 June 2022)

Message from the Guest Editor

Dear Colleagues,

Knowledge is progressively building up related to the potential harm of chemical products to human health, and some agents have been shown to be able to alter endocrine functions, affecting the timing of puberty, fertility, adipose and glucose metabolism, thyroid function, and the control of appetite. Behavior and neurodevelopment are also affected. In order to proceed on the understanding and to be able to plan actions, the contribution of a multidisciplinary approach is of utmost importance.

This Special Issue will focus on basic knowledge, on animal and human studies, and on studies focusing on how to further investigate the effects (ex. epigenetics, omics in general) in order to obtain a full picture. Innovations and plans are welcome. Original papers, reviews, commentaries, and papers focusing on methods and methodology are all also welcome.

Prof. Dr. Hideko Sone

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
