Message from the Guest Editor

Dear Colleagues,

As we all know, the oral mucosa has been a consistent target for collateral damage associated with almost all forms of cancer therapy. The negative outcomes associated with regimen-related mucositis and stomatitis are associated with a significant symptom burden, the inability of patients to tolerate optimum anti-cancer therapy, and higher healthcare resource use and costs. Improved understanding of the pathobiology leading to oral mucosal injury continues to evolve, although there is still much to be learned. This is true, not only of mucositis associated with conventional cytotoxic therapies, but is also increasingly important for targeted and immunotherapies. The anatomic and environmental diversity of the mouth—including multiple epithelia, hard tissue, microbiome, and fluidics—provides a platform for this. This Special Issue aims to highlight current knowledge of mucositis/stomatitis pathogenesis and pathobiology, discuss critical gaps in knowledge and how they may be most effectively studied, and provide conceptual application of the underlying science to the development of potential interventional strategies.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
