submissions:

30 May 2024

Message from the Guest Editor

Dear Colleagues,

Solid organ transplantation is a lifesaving therapeutic strategy for numerous end-stage organ failures. Organ rejection is the most critical problem affecting the long-term survival of allografts, and it is determined by the activation of a host's innate and adaptive immune systems. The initial immune response leading to primary graft dysfunction (PGD) after a transplant is a consequence of the ischemia and reperfusion injury (IRI) to which grafts are exposed during procurement and implantation. Besides IRI, allo-antigen (major histocompatibility complex, MHC) recognition by immune cells also plays a role in acute rejection.

This Special Issue is focused on the mechanisms involved in the development of PGD and acute rejection after IRI and allo-antigen recognition, including, but not limited to, IRI-induced changes in the cellular microenvironment, intracellular metabolic reprogramming, cellular stress and death pathways, damage-associated molecular pattern (DAMP) recognition, recognition of allo-antigens by immune cells, and clinical studies with biomolecular experiments.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
