University, Beijing 100083, China

Deadline for manuscript
submissions:

20 September 2024

Message from the Guest Editor

Dear Colleagues,

Worldwide abiotic stresses including drought, submergence, salinity, high temperature, chilling, low phosphorus, high metal toxicity, etc., lead to significant losses every year in agriculture. Fortunately, there are abundant germplasm or genetic resources that can adapt or even show resistance to each kind of abiotic stress. The knowledge of genetic and molecular mechanisms of resistance or adaptation to abiotic stress in plants could benefit breeding new varieties with higher resistance or better adaptation than released ones. Therefore, all the studies relevant to genetic and molecular mechanisms of resistance or adaptation to the common abiotic stresses, or the related molecular application methods, strategies, etc., are welcome in this Special Issue.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
