

Molecular Mechanisms and Therapies of Lung Cancer and Lung Disease

Guest Editor:

Dr. Paolo Cameli

Respiratory Diseases Unit,
Department of Medicine, Surgery
and Neurosciences, University of
Siena, 53100 Siena, Italy

Deadline for manuscript
submissions:

closed (30 November 2022)

Message from the Guest Editor

Dear Colleagues,

Personalized medicine represents the present and the future of clinical research and practice. The pathogenetic and therapeutic landscape in respiratory medicine widened dramatically in the last years: therefore, a more comprehensive knowledge of molecular pathobiology and mechanisms of action of different treatment on this field is urgently needed. Biologic drugs for severe asthma, checkpoint inhibitors for advanced non-small cell lung cancer and antifibrotic treatment for interstitial lung diseases have revolutionised our clinical practice and life expectancy of these patients, but still their effects are far to be completely elucidated from a biomolecular point of view.

This Special issue aims at expanding the current comprehension of lung diseases pathobiology and the biomolecular effects of the newest therapeutical approaches currently approved. Experimental studies in vitro and in vivo models, review article are all welcome for consideration.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
