Prof. Dr. Tamotsu Zako

Prof. Dr. Masafumi Yohda

Prof. Dr. Masafumi Odaka

Message from the Collection Editors

Molecules are the smallest units of materials. Among them, macromolecules are huge molecules, usually diameter ranging from about 10 to 1,000 nm. Our lives depend on various macromolecules, plastics, resins, and fibers. Our bodies are also made of macromolecules, such as proteins, nucleic acids, sugar chains. Most macromolecules are polymers. Proteins are polymers of amino acids. Nylon is a polyamide polymer. The development of novel materials and the advancement of life science depend on the studies of macromolecules.

Macromolecular science pursues a deeper understanding of the structure, property, and reactivity of macromolecules.

Macromolecular science and technology is multi-disciplinary research that combines physics, chemistry, biology, and engineering. A large number of research teams in Japan from different institutions and universities are working together and devoting considerable efforts to develop and study various macromolecules. This Special Issue is committed to providing an overview of the macromolecular sciences and technologies in Japan.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
