submissions:

31 August 2024

Message from the Guest Editor

Dear Colleagues,

This Special Issue of the journal *IJMS* is about the publication of research articles that deal with the immunological, molecular and cellular changes and peculiarities in patients with multiple sclerosis. Multiple sclerosis is an autoimmune disease that suddenly affects many people. To date, it is not really clear what changes cause patients to become ill. Apparently, MS is an autoimmune disease, a disorder of the immune system that activates the cells of the immune system against the body's own structures. There are several foci in the central nervous system. As an expression of these lesions, patients experience sensory disturbances and movement disorders. These physical limitations are often a shock for patients and literally take their lives away.

The aim of this Issue is to bring together the current state of research on the molecular level of the disease. What disorders of the immune system are found in connection with the disease? Can these new findings possibly help to treat the disease on a molecular level in the near future?

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
