Institute of Food Science
Research (CIAL, UAM-CSIC),
Nicolás Cabrera 9, 28049 Madrid,
Spain

Deadline for manuscript
submissions:

28 June 2024

Message from the Guest Editor

Increasing scientific evidence highlights the role of food-related bioactive compounds in the prevention or amelioration of some diseases. In this regard, efficient and sustainable extraction procedures, followed by comprehensive chemical and functional characterization with high-throughput bioanalytical and omics technologies, represent significant methodological advances to scientifically support health claims of new food-related bioactive molecules.

In this regard, the increasingly frequent multi-omics approaches, such as Foodomics, are contributing to deciphering the molecular mechanisms that underlie the beneficial effects of dietary phytochemicals in preventing the initiation and/or development of major pathologies such as cancer and neurodegenerative and cardiovascular diseases, among others.

This Special Issue is a unique opportunity to gather updated state-of-the-art research studying the recovery of bioactive compounds from food and agri-food sources and their bioactive characterization, making use of the latest extraction, bioanalytical, and omics technologies.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
