closed (30 April 2024)

Message from the Guest Editors

Dear Colleagues,

In mammals, reproductive functions are known to be tightly regulated by energy availability. Atypical weight loss or gain (obesity) negatively affects the reproductive axis. The balance between energy homeostasis and reproduction is monitored by a complex system involving the brain and a variety of peripheral tissues. This process occurs via numerous factors, including metabolic hormones and nutrients.

The aim of this Special Issue is to review emerging aspects of the role of adipokines, endocrine factors secreted primarily by white adipose tissue, in the regulation of fertility and reproduction in health, obesity and reproductive disorders.

Dr. Roberta Lattanzi

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
