Bioresources (IBBR), National
Research Council, Via Pietro
Castellino 111, 80131 Napoli, Italy

Prof. Dr. Alicja Wegrzyn

Phage Therapy Center, University
Center for Applied and
Interdisciplinary Research,
University of Gdansk, Gdansk,
Poland

Deadline for manuscript
submissions:

30 June 2024

Message from the Guest Editors

Dear Colleagues,

Exploring the enzymes essential for key bacterial functions presents an opportunity to develop innovative strategies for combating bacterial infections. Enzymes involved in cell wall biosynthesis are critical for maintaining bacterial cell structure and integrity. By inhibiting these enzymes, it is possible to disrupt cell wall formation, rendering bacteria susceptible to immune responses or other treatments. Similarly, enzymes involved in DNA replication are essential for bacterial proliferation. Targeting these enzymes can impede DNA synthesis and disrupt bacterial replication, potentially curbing infection progression... Moreover, by focusing on enzymes pivotal for bacterial survival, such as carbonic anhydrase, novel therapeutic strategies can be designed to offer effective treatment options for bacterial infections. Thus, the process of understanding and targeting specific bacterial enzymes represents a promising avenue for the development of novel antibacterial agents, as well as for tackling infections and combating antibiotic resistance.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
