Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to collect—from the broadest context—original research and review articles on the functions of RNPs (Ribonucleoproteins) in Human Physiology and Disease Processes. Furthermore, this Special Issue systematically highlights the roles of RNA-binding proteins and noncoding RNAs in regulation of RNA localization, splicing, decay, and translation in contributing to normal physiology and pathology. This issue will contribute to RNA research fields studying basic biochemical/molecular mechanisms of RNPs as diagnostic markers and therapeutic targets for treating human diseases.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
