Message from the Guest Editors

Skin diseases were the fourth leading cause of non-fatal morbidity worldwide, affecting almost one-third of the world's population. Promoting skin healing, while minimizing the aesthetic impact and restoring optimal tissue function, remains a major challenge. This is a complex and tightly regulated multi-step process based on the interaction between numerous cellular and molecular actors. The combination of traditional and innovative approaches has resulted in significant developments in this area; recent advances also include green approaches that use nature itself as inspiration for the development of more sustainable solutions, including natural and degradable wound dressings, bio-based therapeutic agents, bioengineered scaffolds, sustainable tissue-engineered skin substitutes, biological anti-scarring, and re-epithelization solutions, among various other examples.

This Special Issue aims to gather research papers focused on recent advances, current challenges, and future perspectives in the management of skin conditions. Original research articles related to these topics are welcome, as well as review articles summarizing the current state of the art in the field.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of
Odontostomatologic and
Specialized Clinical Sciences,
Sez-Biochimica, Faculty of
Medicine, Università Politecnica
delle Marche, Via Ranieri 65,
60100 Ancona, Italy

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
