Deadline for manuscript
submissions:

31 August 2024

Message from the Guest Editor

Dear Colleagues,

Muscle development is a complex biological process involving the participation of multiple growth factors. Some of the important growth factors include insulin-like growth factors (IGFs), fibroblast growth factors (FGFs), platelet-derived growth factors (PDGFs), transforming growth factor beta (TGF- β), and myostatin (Myostatin). These bioactive molecules play a pivotal role in muscle growth, metabolism, and immunity. This special issue will delve into the latest research advancements in understanding the molecular mechanisms underlying these biological processes. It highlights innovative studies on growth factors, signaling pathways, and immune modulators, offering insights into potential therapeutic targets and strategies for promoting muscle health and combating metabolic disorders.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
