Deadline for manuscript
submissions:

25 May 2024

Message from the Guest Editor

Dear Colleagues,

Fertility preservation on both the male and female side is increasingly important, especially considering the urgent current need to find methods that allow parenthood with one's own genetic background when gonadotoxic therapies at risk of permanent infertility are applied or when a genetic condition responsible for infertility or loss of fertility over time is present.

Papers describing or discussing molecular investigations that help to understand the in vivo or in vitro development of female and male gametes with reproductive potential, as well as those studying the benefits of using nanotechnology and artificial scaffolds for fertility restoration strategies, can be included in this Special Issue.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
