

Molecular Logic of Neural Circuit Assembly in Health and Disease

Guest Editor:

Dr. Mean-Hwan Kim

Department of Physiology and
Biophysics, School of Medicine,
University of Washington, Seattle,
WA, USA

Deadline for manuscript
submissions:

25 July 2024

Message from the Guest Editor

The understanding of the developmental program of synaptogenesis and circuit formation as well as their modification/refinement throughout the lifespan is crucial for our brain function and the neuroscience field in general. A myriad of synaptogenic factors promote synaptic formation, while anti-synaptogenic factors modulate this process, ensuring balanced circuit formation. Beyond these factors, transcriptional regulators of synaptogenesis exert significant control, orchestrating the expression of genes vital for synaptic development and maturation. Perturbations in these molecular mechanisms can lead to abnormalities in brain function, manifesting as deficits in cognitive, sensory, and motor processes. Therefore, understanding these molecular pathways offers invaluable insights into neural circuitry formation, shedding light on potential therapeutic strategies for addressing circuit-specific behavioral anomalies.

This Special Issue will bring together original research and review articles on the molecular mechanisms of neural circuit formation. It highlights new discoveries, approaches, and technical developments in molecular components of synapse and circuit formation.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
