Message from the Guest Editor

Dear Colleagues,

Brain metastasis is the stage of cancer resulting from cancer cell colonization of the brain. Brain metastasis represents a compendium of devastating diseases, arising from several cancer types, mostly fatal, because of the extremely poor prognosis when compared to primary cancers treatment. Furthermore, mechanisms underlying brain metastasis remain largely unknown. This Special Issue is the continuation of Special Issue “Brain Metastasis” and “Brain Metastasis 2014”. This Special Issue will assess, report, and discuss new discoveries in the biology, pathology, and treatment of brain metastasis.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
