Message from the Guest Editors

Dear Colleagues,

Cardiovascular active substances contribute to the maintenance of cardiovascular homeostasis. Conversely, disturbances might potentially induce cardiovascular diseases (CVDs). Cellular events, including endoplasmic reticulum stress, mitochondrial dysfunction, and apoptosis induced by some substances or inflammation, also play important roles in the development of CVDs. In this Special Issue, we aim at collecting current knowledge of those cardiovascular active substances and cellular events, summarize their mechanisms of actions, on both cardiovascular physiology and pathophysiology, and explore their potential applications in the treatment and diagnosis of CVDs.

Prof. Dr. Hideyuki Yamawaki

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
