Message from the Guest Editors

We are putting together a Special Issue entitled Advances in Molecular Activity of Potential Drugs. We invite papers that are related to the broadly understood progress in the field of investigating new compounds, potential drugs, and drugs that are already used in therapies. We encourage you to submit works carried out on model organisms, cell lines, animals, and as part of clinical trials. Research showing new molecular activities of already-used drugs, as well as on compounds that are potential drugs, are welcome. It is also important in this field of research to search for synergisms to find compounds that, when used together, act strongly and more efficiently in the therapy. Review articles summarizing published research are also very valuable for drawing conclusions and searching for further methods of research.

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
