15 December 2022

Message from the Guest Editors

Pituitary adenomas are among the most frequent intracranial tumors. These adenomas variably and adversely affect morbidity and mortality depending on cell type, hormone secretory activity, and growth behavior. For most clinically apparent adenomas, multimodal therapy controlling hormone secretion and adenoma growth leads to improved quality of life and normalized mortality. However, the pathogenesis of pituitary adenomas is largely unknown and evidence indicates that the pituitary tumorigenesis is a complex process involving multiple factors, including genetic and epigenetic changes.

In recent years, evidence of the incidence of pituitary hormones in different types of cancers started to emerge. However, it is controversial if they protect tumor development or the opposite, have an oncogenic effect. More studies are needed to conclude their role in cancer.

This article collection welcomes studies with a focus on the Pathophysiology of Pituitary Tumor and the role of pituitary hormones in cancer, using animal models, and human and in vitro systems.
Editor-in-Chief

The International Journal of Molecular Sciences (IJMS, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. IJMS publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in IJMS and consider publishing your next paper with us.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry & Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
