Message from the Guest Editor

Dear Colleagues,

Protein homeostasis is crucial for the maintenance of neuronal integrity and functions. Disturbances are associated with premature aging, neurodegenerative and neuropsychiatric diseases or inability to adapt to mild stresses. The protein balance is particularly challenged under stress imposed by, e.g., ischemia, nutrient deficiency, metabolic damage, infection, inflammation, axonal trauma, or immune attack, because ER stress may enhance mis-folding, and enhanced loads of damaged proteins need to be removed to allow for regeneration and renewal. In the present Special Issue, we invite contributions related to protein homeostasis in neurons and neurological diseases. For detailed information, you can refer to http://www.mdpi.com/journal/ijms/special_issues/proteostasis_r

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
