Informatics

MDPI

Message from the Editor-in-Chief

Informatics is an up-and-coming and innovative journal, offering an outlet for open access research papers and discussions. The scope of the journal builds upon a definition of informatics that encompasses technologies of information and communication as well as the biological, social, linguistic and cultural changes that initiate, accompany and complicate their development; a characterization more fully articulated in the EiC's opening editorial (http://www.mdpi.com/2227-9709/1/1/1).

Aims

Informatics (ISSN 2227-9709) is an international, peer-reviewed, open access journal, which publishes original theoretical and empirical work on the science of informatics and its application in multiple fields. Our concept of informatics includes technologies of information and communication as well as the biological, social, linguistic and cultural changes that initiate, accompany and complicate their development.

Scope

- human–computer interaction
- media arts and sciences
- medical informatics
- health informatics
- social informatics
- business informatics

Author Benefits

Open Access
Unlimited and free access for readers

No Copyright Constraints
Retain copyright of your work and free use of your article

Thorough Peer-Review

No Space Constraints, No Extra Space or Color Charges
No restriction on the maximum length of the papers, number of figures or colors

Journal Rank
CiteScore - Q1 (*Communication*)

Coverage by Leading Indexing Services
Scopus, ESCI (Web of Science), dblp, and other databases

Rapid Publication
A first decision is provided to authors approximately 30.3 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the second half of 2023)
