Deadline for manuscript submissions:
closed (31 July 2023)

Message from the Guest Editors

Dear Colleagues,

We are organizing a Special Issue entitled: "Information Analysis and Retrieval in Social Media" in the journal *informatics*. This is an international peer-reviewed open access journal on information and communication technologies, human–computer interaction, and social informatics and is published quarterly online by MDPI. For detailed information on the journal, please refer to https://www.mdpi.com/journal/informatics.

The multitude of contents that are generated every day through social platforms confront users with the problem of accessing information relevant to their information needs. Over the years, Information Retrieval has proposed various solutions to help users solve this "information overload" problem; however, the characteristics of the content generated through social media require a new phase of analysis and the development of new solutions.

Message from the Editor-in-Chief

Informatics (ISSN 2227-9709) is an international, peer-reviewed, open access journal, which publishes original theoretical and empirical work on the science of informatics and its application in multiple fields. Our concept of Informatics includes technologies of information and communication as well as the biological, social, linguistic and cultural changes that initiate, accompany and complicate their development.

Informatics publishes regular research articles, reviews and short notes. There is no restriction on the length of papers, and we encourage researchers to publish their theoretical and empirical results in as much detail as possible. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), dblp, and other databases.
Journal Rank: CiteScore - Q1 (*Communication*)
