Madrid, 28040 Madrid, Spain

Deadline for manuscript  
submissions:

**closed (31 May 2023)**

### Message from the Guest Editors

Privacy and data protection are important topics for ensuring accountability and responsibility in recent technological advances like machine learning, Internet of Things, and the increasing amounts of data they rely on. This Special Issue seeks novel theoretical or applied research on designing, developing, integrating, testing, and evaluating approaches for systems or approaches regarding personal data processing. In particular, we invite work supporting privacy and data protection principles, regulations, or techniques, including new theories, foundations, vocabularies, tools, and significant case studies of privacy- or data-protection-aware implementations. Such work could be supported by AI approaches, such as knowledge graphs, privacy-preserving techniques, and interdisciplinary research—especially that exploring the intersections of computing and informatics with law, ethics, and psychology. Such proposals should explore making data protection and privacy principles deployable in real-world applications, with reduced costs, and moving towards a more trustworthy, transparent, and accountable world.

an Open Access Journal by MDPI

## Editor-in-Chief

## Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

*Information* is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Ei Compendex](#), [dblp](#), and [other databases](#).

**Journal Rank:** CiteScore - Q2 (*Information Systems*)
